

IT Helpdesk Bot – Detailed Student Lab (Copilot Studio)

This lab provides step-by-step instructions to build a working IT Helpdesk bot using Copilot Studio.

Steps

Step 1: Open Copilot Studio and create a new agent named 'IT Helpdesk Bot'.

Step 2: Go to Topics and create a new topic.

Step 3: Set Trigger → A message is received.

Step 4: Add Question (Issue)

Question: Please describe your issue
Identify: User's entire response
Save as: user_issueText

Step 5: Add Question (Email)

Question: Please enter your email ID
Identify: User's entire response
Save as: user_email

Step 6: Add Message

Your IT ticket has been created successfully.

Issue: {user_issueText}
Email: {user_email}

Step 7: Save → Test → Publish

Expected Output

Issue: My VPN is not working
Email: abc@test.com
